Open Badges

Open Badges are **visual tokens** of achievement, affiliation, authorization, or other trust relationship sharable across the web.

Open Badges **represent a more detailed picture than a CV** or résumé as they can be presented in ever-changing combinations, creating a constantly evolving picture of a person's lifelong learning.

Open Badges are **digital credential systems** that adopt the OBI - Open Badges Infrastructure standard and apply the blockchain in line with the IMS Global Standard, as a tool to represent, understand (both human and machine), **verifiability, traceability, sharing, portability and recognition of the results or skills achieved** by a learner even in **non-formal contexts** (e-learning and WBL)

Open Badges

The screenshot displays the FODIGRET web application interface.
